

AMENDMENTS TO THE DRAWINGS

Please replace current drawing sheet 2, containing Fig. 3, with the enclosed replacement sheet 2. Fig. 3 has been amended to make the following changes:

- (a) the reference character “9” and an accompanying lead line pointing to the connecting element 6 has been added for each of the support elements 4a located at the top-left, bottom-left, and bottom-right corners of the holding device;
- (b) the reference character “9” pointing to the support element 4b located at the bottom-left corner of the holding device has been replaced with reference character “6”; and
- (c) the reference character “9” pointing to the upper connecting element 6 of the support element 4b located at the bottom-right corner of the holding device has been deleted.

These changes to Fig. 3 are supported, for example, by at least paragraph 0022 of the specification, where it states that the “support elements 4b . . . are . . . fixated in the underlayer by means of two connecting elements 6” and that the “support elements 4a are mounted in the underlayer by means of just a single connecting element 6 [that] acts in this case as a pivot point 9.” Accordingly, the Applicant submits that the amendments to Fig. 3 introduce no new matter.
